A Program I Want to Share with You

You will soon receive my annual newsletter highlighting the important things we accomplished during the 2013 Legislative Session and all the money we were able to bring home to Waterbury. In the meantime, I wanted to share with you this interesting and potentially money saving program I recently learned about and a couple of events as well.

Home Energy Solutions (HES) Library Presentations - Wednesday, August 21; Tuesday, September 10

6:00 to 7:30 p.m. at Silas Bronson Library, 267 Grand Street

These presentations will provide guests with information on the popular Home Energy Solutions (HES) program, which brings CL&P-authorized energy professionals to your house, condo or apartment to conduct \$1,000 worth of energy-saving services for only \$75 for homes heating with electricity or natural gas, \$99 for homes heated with fuel oil and propane, and free for those who meet income eligibility guidelines.

Lighting Fair - Wednesday, August 14 - 9:00 a.m. to 5:00 p.m. at the Waterbury City Hall, 235 Grand Street

The City of Waterbury and CL&P will host a lighting fair to encourage residents to purchase compact fluorescent and LED bulbs. Energy experts will be on-hand during these lighting fairs to explain the Energize Waterbury campaign and to help residents learn more about energy-efficient lighting. Energy efficient lighting will be available to purchase at a discounted price at the fairs, while supplies last.

Save money through Energize Waterbury

Are you looking for ways to cut costs and make your home more energy efficient? Look no further than Energize Waterbury – a citywide campaign that offers special programs and pricing to help residents save money and conserve energy.

Now through September 30, 2013, programs are available for existing homes, apartments, condos, and for homeowners building new homes or remodeling.

Programs include Home Energy Solutions – a popular service that brings CL&P-authorized energy professionals right to your house, condo or apartment, where they will locate and seal critical air leaks, replace incandescent lights with energy-saving bulbs, insulate your hot water pipes and evaluate your heating and cooling equipment, insulation and major appliances.

These services are valued at an average of \$1,000, but as part of the Energize Waterbury campaign, CL&P customers pay only \$75 (for homes heating with electricity or natural gas) or \$99 (for homes heating with fuel oil or propane). There is no charge for customers who meet income guidelines, and those customers may be eligible for additional services such as free refrigerator, furnace and insulation upgrades.

Home Energy Solutions participants will reduce their energy costs by an average of \$200 a year and savings can be significantly higher when customers take additional

steps to save energy. As part of the Energize Waterbury campaign, high efficiency insulation heating and cooling equipment will be available at competitive prices for city residents.

Also as part of Energize Waterbury, residents who live on or close to the natural gas main are encouraged to learn more about energy-efficient natural gas. There are special financing options and loans at low-interest rates from local lenders and state energy programs that can help Waterbury residents with the cost of installing natural gas equipment.

For more information or to sign up for a program, please call 877.WISE.USE (877.847.3873) or visit www.energizect.com/communities/programs/Energize-Waterbury.

Energize Waterbury is brought to you by CL&P and Yankee Gas in partnership with the City of Waterbury as part of Energize Connecticut, an initiative of the Energy Efficiency Fund, the Clean Energy Finance and Investment Authority, the state, and your local electric and gas utilities, with funding from a charge on customer energy bills.
