

STATE REPRESENTATIVE

BRUCE V. MORRIS

NORWALK | 140TH HOUSE DISTRICT

LEGISLATIVE UPDATE

As your state representative I am dedicated to creating a more efficient government, while ensuring the protection of all our citizens and their rights.

I am honored to serve our district and promote legislation that leads to a more affordable and better functioning education system for our children.

In addition, I continue to work to reduce energy costs, create affordable housing and prevent crime. These are a few measures that will help the state to grow and develop into the future. As your representative at the Capitol, I encourage any input you may have so that I can continue to work for a better district and Connecticut.

Sincerely,

Rep. Bruce Morris

BETTER-EDUCATED COMMUNITIES

I believe that continued reform to the education system is necessary to promote generations of well-educated, responsible and work-ready young adults who can then continue to contribute to the overall growth of the state and urban areas in particular. Changes to the Education Cost Sharing formula have brought an additional \$1 million to the Norwalk public school system since 2010. In addition, during this time period, the school district has continued to receive increased funding totaling about \$1.3 million from priority school district grants. While these funds do not represent Norwalk's fair share, the additional money will prove critical to the ongoing fight for a better and more positive academic environment to be shared by students in the Norwalk school system.

A MORE ENERGY EFFICIENT STATE

As a member of the Energy and Technology Committee, I am constantly working to help strengthen our state's competitiveness in this sector. It requires a constant effort to bring sustainable and environmentally conscious economic growth. Today, it is imperative that we strive for energy efficiency while promoting stability and development within our communities. This past year, I successfully worked to pass a bill concerning the state's comprehensive energy strategy. The legislation is expected to expand energy choices, lower utility bills for Connecticut residents and businesses, improve environmental conditions and generate at least 10,000 clean energy jobs.
