

Saving Money On Your Utility Bills And Improving Storm Response

Dear friends and neighbors:

I would like to share with you some services that are available for you to lower your utility bills. In this tough economic climate, we all feel the pinch of higher heating and electric costs.

I am sending this information to help you reduce your costs and put some money back in the family pocket. Please consider a Home Energy Audit and cut your utility costs with a program created by the state that YOU already pay for with a small charge on your bill. Your cost is only \$75 but the audit is truly a value, typically saving the average homeowner \$150-250 or more.

Saving Money On Your Utility Bills

Connecticut Light and Power offers the Home Energy Solutions (HES) Program, which provides ways to reduce your home's energy costs. With support from the state's Energy Efficiency Fund, the HES Program offers valuable services aimed at reducing customers' monthly bills. Your home will be tested with state of the art equipment and made more efficient and cheaper to run.

For more information, call 1-877-WISE-USE (1-877-947-3873) or go to the CL&P website at www.cl-p.com.

Here Is What You Get With A Home Energy Assessment:

- 💡 Up to 25 energy saving light bulbs.
- 💡 Your furnaces and boiler tested for proper operation.
- 💡 Water saving devices, such as shower heads and faucet aerators installed.
- 💡 Air leaks will be sealed with special foam, windows caulked and weather stripping and door sweeps installed where needed.

Improving Storm Response

We all agree that our utility companies did not meet our expectations during and after last year's storms. Clearly, they need to be more accountable in restoring service and meeting customer needs. There are several proposals that I'll be supporting that will improve storm and emergency response of our utilities by establishing benchmarks for service restoration and imposing significant fines on the utilities if they fail to meet those standards.
