While our communities have faced devastating hardship this year, we are beginning to see brighter and stronger days ahead. With a new administration in the White House, our state has a unique opportunity to leverage federal funding and make the types of targeted investments in our public health to put us on a path to full recovery.

I've highlighted a few proposals that House Democrats have advanced out of our budget committees, along with a few items that I'm personally endorsing.

Please reach out to me at any time for more information.
